

Horizontal Rice Water Polishers Series EPG

EPG40 - EPG50

- ❑ This machine has been designed to increase the finishing quality and brightening of the rice kernel.
- ❑ Built with food-grade Stainless Steel. Removal of loosen bran has shown an increase in shelf life of the packaged rice.
- ❑ First a separate watering chamber distributes moist throughout the content of rice, then the rice is fed to the final polishing and drying stainless-steel roller.
- ❑ Separate air pressure (for water injectors) and water flow rate controllers allow precise control of the finishing quality of the product.

Model	EPG40	EPG50
Capacity T/H	Up to 4 MT (Long Grain)	Up to 5 MT (Long Grain)
Power (HP)	50 + 10(FAN)	60 + 10(FAN)
Air Volume (cu. Meters/Min)	2800 Cubic Meters / Hr	
Static Pressure (mm H ₂ O)	90 - 110	

TYPICAL INSTALLATION (EPG40 SHOWN)
